

Medical Reserve Corps

Office of the Surgeon General

U.S. Department of Health and Human Services

www.medicalreservecorps.gov

www.medicalreservecorps.gov

The Medical Reserve Corps Web site offers a wealth of information on the program, including a Media section, News and Events, Resources, and Spotlights on volunteers, units, and organizations. Visit www.medicalreservecorps.gov for even more!

Media

To get started, check the Media section on the bottom, right-hand corner of the homepage. Within this section, users will find electronic copies of the MRC Brochure, Surgeon General Priorities and the MRC information card, MRC Fact Sheet, and a link to the latest News and Events regarding the Medical Reserve Corps.

News and Events

Check the News and Events page to read other stories written about the MRC, which is found by clicking the link in the Media section, or from the left-hand navigation bar on the homepage. News and Events provides users with links to recent articles, press releases, and other events pertaining to the MRC at the local, state, and national levels.

Resources

On the Resources page, found by clicking on the link in the left-hand navigation bar on the homepage, users will find tools for MRC units to utilize on topics ranging from Promising Practices to Organizational Structure and Emergency Preparedness and Response to Public Health Initiatives. This is where unit leaders, program partners, and those interested in the MRC find ways to start, improve, or sustain an MRC unit.

Spotlights

Volunteer, Unit, and Organization Spotlights are written and posted monthly to highlight the achievements and success of individuals and entire units, as well as collaboration opportunities available to MRC units. These are found in the Volunteer and Leader sections at the bottom, center of the homepage. Spotlights identify real-life stories and situations where volunteers, leaders, and organizations are working as part of the MRC to better the health and safety of the nation, providing users with better insight on the program.
